Biosafety Available Training

IBC Required Training (online)

Before an IBC protocol can be approved, PIs and authorized personnel must be up-to-date with all applicable training. Go to IBC Requirements

Live Training

In addition to the trainings that are required by the IBC, the Biosafety Office delivers live trainings upon request.

This training provides an introduction to biological safety issues including definitions, risk assessment, principles, safe laboratory practices and disinfection methods. Approximately 1 hour.

Biosafety 101

This training includes instructions on the proper selection, care, use and maintenance of biological safety cabinets. Approximately 40 min

Biosafety Cabinets

Not a researcher but needing to visit a lab as part of your job duties? You must be aware of the hazard that might be present in the location. Go to Lab Hazard Awareness Training
