

Item Classification Guide

The list of items below are examples of items that require a review by the [Export Control Officer](#). This list is not inclusive and serves only as a guide.

- Biological select agents and toxins, pathogens, viruses
- Cryogenic Devices
- FLIR
- High Performance Computers
- High-Technology Communication Devices Inertial or Navigation Technologies
- Infrared Camera
- Inverse Synthetic Aperture (ISAR), laser, optical
- Lasers - DILs, DF-CO2, Ion, Electron, etc.
- Lenses - for radiation hardened 1V cameras
- Marine Technologies
- Network Analyzers
- Radar - tracking, airborne, altimeters, antennae
- Robots
- Sensors - Angular rate, monospectral imaging, optical, direction finding, quartz, etc.
- Software that includes source code or encryption technologies
- Transistors - microwave, test equipment, S- parameter measurement
- Two dimensional focal plan arrays
- Unmanned Aerial Vehicles (UAVs) - associated equipment, systems, & components
- Unmanned submersible vehicles - tethered and untethered
- Uranium - natural or depleted, compounds & powders, titanium alloys, vapor products & tails collector systems, isotopes separation, lasers or laser systems, equipment & components
- Ventilated full or have (protective clothing) suits
- Vessels - marine, positioning systems, austenitic stainless steel, marine systems or equipment
- Waveform digitizers
- Welders - MIG, E-beam, laser machines
- Wind tunnel aero-model technology
- Windows - glass for nuclear radiation shielding
- X-ray equipment - converters, generators, non- planar inspection equipment, projection image transfer

For a more detailed listing of items that are controlled under the Export Administration Regulations, please refer to the [Commerce Control List](#). For items that are controlled under the International Traffic in Arms Regulations, please refer to the [U. S. Munitions List](#).
