

Product Classification Form

The University of Cincinnati is requesting that you, the vendor/manufacturer of the item(s) being procured, supply the export classification as it pertains to the appropriate regulation (EAR¹/ITAR²) of each item on the invoice. Per [15 CFR 758.3](https://www.ecfr.gov/current/title-15/chapter-I/subchapter-A/part-758/subpart-3/section-758.3), it is the responsibility of the manufacturer or supplier, not the buyer or freight forwarder, to identify the export classification of items being procured. The University of Cincinnati is not asking your company to apply for an ECN or license; we are asking you to identify the level of control associated with your product (s). Even if the item is "EAR99", we will need to appropriately adhere to U.S. laws and regulations. If your organization is outside of the U.S. you may use the Wassenaar Arrangement³ guide for identifying the classification.

If your organization does not have export classification determinations, the U.S. Department of Commerce has an online decision tool available to assist you with the **"CCL Order of Review"** (<https://www.bis.doc.gov/index.php/export-control-classification-interactive-tool>)

Additionally we are requesting that the export classification code, the U.S. Harmonized Tariff Schedule (US-HTS) is provided. You can find an online resource called HTS Code at (<https://hts.usitc.gov/>). Used with the U.S. International Trade Commission's official HTS (<https://www.trade.gov/harmonized-system-hs-codes>), you can identify the 10-digit code easily.

For assistance contact our Export Control Office: (<https://research.uc.edu/support/offices/export-controls/>).

Please complete the form below for all products that are being procured under the same requisition. You may attach an Excel spreadsheet for numerous items. This form is to be completed and returned to the University of Cincinnati, together with supporting information (including a
