

ACUP Satellite Animal Use Area

PI: _____ IACUC Protocol #: _____

Lab Emergency Contact Information: _____

MINIMUM REQUIRED PPE WHEN WORKING WITH ANIMALS*

* Animals or animal products such as dander, hair, scales, fur, saliva, and body wastes contain allergens that can cause both respiratory and skin disorders - Reference UC Environmental Health and Safety Advisory 12.4. If you are not an animal handler but may have ancillary exposure; your risk of developing allergies to animals is low. If you have any questions or concerns, please contact the Principal Investigator, safety personnel, or the Animal Regulatory Compliance Office.

Lab coat

Gloves

Surgical mask

N95 mask (rat only)

Additional PPE is required for survival surgery (Reference ACUP Survival Surgery Guidelines).

Additional PPE may be required for chemical, biological or other hazards (Reference your IACUC protocol, IBC approval, chemical advisories and related documents).

EHS Advisory 12.4

- Live animals should not be left unattended
- Animal cages must be identified with the PI and protocol
- Animal procedure area must be disinfected before and after use
- Animals must be returned to the vivaria according to ACUP requirements
